References with (L) are to Letters to the Editor; with (A) to Abstracts.

Absorption Phenomena
Absorption coefficient of acetyl halides, D. H. Etzler and G. K. Rollefson—653(L)
Absorption Spectra
Of alkali halide-thallium phosphors, F. Seitz—150
Of allene, E. H. Eyster—580
Applications in chemistry, O. R. Wulf—174(A)
Of azomethane, W. West and R. B. Killingsworth—1
Bands ascribed to HNO_2, D. M. Newitt and L. R. Outridge—752
Of CH_3OD and CH_2DOD, E. F. Barker and G. Bosschieter—563
Of carboxylic acid, M. M. Davies and G. B. B. M. Sutherland—755, 767
Of cis- and transbutene-2, H. Gershinowitz and E. B. Wilson, Jr.—247
Of cobalt chloride solutions, J. N. Pearce and L. R. Dawson—128
Of cobalt chloride solutions, R. Brdička—404
Of cyclohexene, cyclopentene, 1-3 cyclohexadiene and benzene, E. P. Carr and H. Stücklen—55
Of cyclopropane and ethylene oxide, J. W. Linnett—692
Of cyclopropane, ethylene oxide, ethylene sulfide, and ethylene imine, E. H. Eyster—576
Of deutero-formaldehyde, E. S. Ebers and H. H. Nielsen—311
Of double and single formic acid molecules, L. G. Bonner and R. Hofstadter—531
Of ethane, B. L. Crawford, Jr., W. H. Avery and J. W. Linnett—682
Of free hydroxyl, O. Oldenberg and F. F. Rieke—169(L)
Of glucose glass, W. M. Cohn—65
Of heavy acetic acid, R. C. Herman and R. Hofstadter—110(L)
Of heavy formic acid, R. Hofstadter—540
And hydrogen bond, A. M. Buswell and W. H. Rodebush—296(L)
And hydrogen bond, R. Freymann—497(L)
Of H_2O, HDO, and D_2O in inert solvent, L. B. Borst, A. M. Buswell and W. H. Rodebush—61
Of light and heavy acetic acid, R. C. Herman and R. Hofstadter—534
Of liquid crystals, R. Taschek and D. Williams—546
Of methyl alcohol, A. Borden and E. F. Barker—553
Of methylamine and free rotation, H. W. Thompson and H. A. Skinner—775
Of nickel carbonyl, B. L. Crawford, Jr., and P. C. Cross—525
Of nickel carbonyl vapor, C. R. Bailey, and R. R. Gordon—225(L)
Of omega-hydroxyundecanoic acid, M. M. Davies—770
Of organic molecules in dilute solution, O. R. Wulf and L. S. Deming—702
Of OH group of phenol, W. Gordy and A. H. Nielsen—12
Of protein and of H_2O and D_2O in gelatin, J. W. Ellis and J. Bath—723
Of rare earth ions, S. Freed and S. I. Weissman—297(L)
Of rare earth salts, K. S. Krishnan and D. C. Chakrabarty—224(L)
Of sucrose crystals in polarized light, J. W. Ellis and J. Bath—221(L)
Temperature effect in spectrum of phenol, R. R. Brattain—298(L)
Of trivalent europium ions, S. Freed and H. F. Jacobson—654(L)
Vapor-liquid-solution displacement, J. W. Ellis and E. L. Kinsey—497(L)
Of water in gelatine, J. W. Ellis and J. Bath—108(L)
Of water in solutions, E. K. Plyler and E. S. Barr—316
Accommodation coefficients
Of methane, argon, ethylene, and ethane, G. B. Kistiakowsky and F. Nazmi—18
Alloys
Interaction of atoms in, W. Shockley—523
Next nearest neighbor interaction, F. Bitter—339(L)
Amorphous substances
Absorption spectrum of glucose glass, W. M. Cohn—65
Apparatus and methods
Automatic prism spectrometer for infra-red, H. Gershinowitz and E. B. Wilson, Jr.—197
Polarization of Raman lines, J. T. Edsall and E. B. Wilson, Jr.—124
Surface slit viscosimeter, W. D. Harkins and J. G. Kirkwood—53(L)
Limits of infra-red sensitizing, G. Kornfeld—201
Atomic spectra
Of rare earth ions, S. Freed and S. I. Weissman—297(L)
Of trivalent europium ions, S. Freed and H. F. Jacobson—654(L)

Collision Phenomena
Of electrons and mercury atoms, J. H. Simons and R. P. Seward—790
Formation of HgH, HgD, and CdD, L. O. Olsen—307
Intermolecular forces, J. O. Hirschfelder, R. B. Ewell and J. R. Roebuck—205
Intermolecular forces from Joule-Thomson coefficients, J. O. Hirschfelder, R. B. Ewell, and J. R. Roebuck—177(A)
Propagation of sound in gases, H. L. Saxton—30
Colloids
Attractive and repulsive forces in tactoids, thixotropic gels, protein crystals and coacervates, I. Langmuir—873
Colloidal gold in clinical tests on spinal fluid, P. K. Glasoe and C. H. Sorum—177(A)
Condensation in Wilson cloud chamber, L. B. Loeb, A. F. Kip and A. W. Einarsson—264

Crystalline state
Compressibilities of alkali metals, J. Bardeen—372
Density of energy states, S. H. Bauer—403
Energies of metallic Li and Na, J. Bardeen—367
Order and disorder in spinels, F. C. Blake—630
Order for copper gold alloys, W. Shockley—130
Solid-liquid equilibrium in argon, O. K. Rice—472

Dielectric constants
Absorption in polar media and local field, R. H. Cole—385

Diffusion
Of helium and hydrogen through Pyrex, N. W. Taylor and W. Rast—612
Of hydrogen through nickel, C. B. Post and W. R. Ham—598
Temperature, variation of, H. S. Taylor—331

Dipole moments
Of azomethane, dimethylhydrazine and acetaldazine, W. West and R. B. Killingsworth—1
Of formic acid vapor, I. E. Coop, N. R. Davidson and L. E. Sutton—905(L)
Of methyl and ethyl alcohol molecules, J. D. Stranathan—395
Of molecules containing two dipoles, J. Y. Beach and D. P. Stevenson—635
Recent advances, C. P. Smyth—173(A)
And surface potentials, M. Gerovich, A. Frumkin and D. Vargin—906(L)

Electrolytes
Electromotive force of cells containing D_2O, G. W. Vinal and L. H. Brickwedde—175(A)

Electron affinity
Of mercury, J. H. Simons and R. P. Seward—790

Electron diffraction
Diffuse patterns, J. T. Burwell—749
By ethylene chloride, J. Y. Beach and K. J. Palmer—639
By hydrides of boron, S. H. Bauer—176(A)
By ketene and thiophosphoryl chloride, J. Y. Beach and D. P. Stevenson—75
Oxidation of iron, H. R. Nelson—606
By single and multiple molecular layers, L. H. Germer and K. H. Storks—280
Structure of gas molecules, J. Y. Beach and L. Pauling—173(A)
By unimolecular and multimolecular layers, L. H. Germer—171(A)

Errata
Thermodynamic functions of chloro- and bromomethanes, formaldehyde and phosgene, D. P. Stevenson and J. Y. Beach—108(L), 341(L)
Ortho- parahydrogen conversion, L. Farkas and U. Garbatski—904
Structure and reaction of organic compounds, Louis P. Hammett—907

Fungicides
Electrodialysis of, A. A. Nikitin—176(A)

Heat capacity (see **Thermodynamic properties**)

Hydrogen
Adsorption of hydrogen and deuterium, A. Wheeler—746
Diffusion through nickel, C. B. Post and W. R. Ham—598
Effect of deuterium substitution on color, S. H. Maron and V. K. LaMer—299(L)

Hydrogen
Low temperature properties of hydrogen and deuterium, F. G. Brickwedde—173(A)
Ortho- parahydrogen conversion, L. Farkas and U. Garbatski—260, 904

Ionization
Condensation on ions in Wilson cloud chamber, L. B. Loeb, A. F. Kip and A. W. Einarsson—264

Isotopes
Absorption spectrum of acetic acid-*d*, R. C. Herman and R. Hofstadter—110(L)
Adsorption of hydrogen and deuterium, A. Wheeler—746
Carbon isotope effect in dimethylacetylene, G. Glockler and M. M. Renfrew—408(L)
Concentration of N^{15} and S^{34}, H. G. Thode, J. E. Gorham and H. C. Urey—296(L)
Effect in spectrum of CCl_4, C. K. Wu, and G. B. B. M. Sutherland—114
Electromotive force of cells containing D_2O, G. W. Vinal and L. H. Brickwedde—175(A)
Exchange between deuterium and hydrogen chloride, P. A. Leighton and P. C. Cross—345
Exchange of deuterium between methanol and water, J. O. Halford and B. Pecherer—571
Fractionation of lithium and potassium, T. I. Taylor and H. C. Urey—429
Isotope effect in benzene, B. S. R. Rao—343
Low temperature properties of hydrogen and deuterium, F. G. Brickwedde—173(A)
Mercury photosensitized hydrogenation of ethylene and deuterized ethylenes, J. C. Jungers and H. S. Taylor—325
Oxygen exchange between glycine hydrochloride and water, W. H. Mears—295(L)
Oxygen exchange reactions, M. Cohn and H. C. Urey—175(A)
O^{18} in exchange reactions, I. Roberts—294(L)
Photolysis of deutero-ammonia, M. Burton—680
Raman spectra of benzene and benzene-d_6, A. Langseth and R. C. Lord, Jr.—203
Raman spectra of deutero-ethylenes, M. de Hemptinne, J. Jungers and J. M. Delfosse—319
Raman spectra of hydrogen and deuterium sulfides, G. W. Murphy and J. E. Vance—426
Raman spectrum of benzene, H. C. Cheng, C. F. Hsueh and Ta-You Wu—8
Raman spectrum of benzene and isotope effect, B. S. R. Rao—343
Separation by diffusion, R. Sherr—251
Separation of, H. C. Urey—172(A)
Separation of carbon isotopes, P. Capron, J. M. Delfosse, M. de Hemptinne and H. S. Taylor—656(L)
Spectra of CH_3OD and CH_2DOD, E. F. Barker and G. Bosschieter—563

Spectra of deutero-formaldehyde, E. S. Ebers and H. H. Nielsen—311
Spectra of H_2O, HDO and D_2O in inert solvents, L. B. Borst, A. M. Buswell and W. H. Rodebush—61
Spectra of light and heavy acetic acid, R. C. Herman and R. Hofstadter—534
Spectrum of heavy formic acid, R. Hofstadter—540
Spectrum of N^{14}, N^{15}, R. W. Wood and G. H. Dieke—734
Spin of N^{15}, R. W. Wood and G. H. Dieke—908(L)

Kinetics of reactions
Absolute reaction rates, entropy of activation, A. E. Stearn—176(A)
Of alkyl radicals, E. W. R. Steacie and N. W. F. Phillips—179
Alpha-particle reaction in CO, O_2, J. O. Hirschfelder and H. S. Taylor—783
Atomic hydrogen and ethane, E. W. R. Steacie—37
Between nitric oxide and chlorine, I. Welinsky and H. A. Taylor—466
Conversion of parahydrogen and orthodeuterium by nitrous oxide, L. Farkas and U. Garbatski—260
Decomposition of alkyl halides, P. Veltman and F. Daniels—175(A)
Decomposition of ammonia by alpha-rays, C. Smith and H. Essex—188
Decomposition of chloropicrin, E. W. R. Steacie and W. McF. Smith—145
Decomposition of mercury dimethyl, J. P. Cunningham and H. S. Taylor—359
Diffusion of gases through glass, N. W. Taylor and W. Rast—612
Exchange between deuterium and hydrogen chloride, P. A. Leighton and P. C. Cross—345
Exchange of oxygen between water and organic compounds, I. Roberts—294(L)
Hydrogen atoms and carbon tetrachloride, J. E. Vance and W. C. Bauman—811
Inhibition of homogeneous organic decompositions, F. O. Rice and O. L. Polly—273
Lifetime of free CN radical, J. U. White—294(L)
Low temperature oxidation of iron, H. R. Nelson—606
Nonadiabatic reactions, M. G. Evans, H. Eyring and J. F. Kincaid—349
Organic compounds with x-ray activated water, H. Fricke, E. J. Hart and H. P. Smith—229
Oxygen exchange between acetone and water, M. Cohn and H. C. Urey—175(A)
Of OH radicals, O. Oldenberg and F. F. Rieke—779
Role of free radicals, F. O. Rice and E. Teller—489
Spectrum of free hydroxyl, O. Oldenberg and F. F. Rieke—169(L)
Test for free OH, O. Oldenberg and F. F. Rieke—439
Theory of, A. Sherman—175(A)
Theory of adsorption, G. E. Kimball—447

Liquids
Dielectric absorption in polar media, R. H. Cole—385
Free volumes and free angle ratios, J. F. Kincaid and H. Eyring—620
Raman effect of ethylene, G. Glockler and M. M. Renfrew—170(L)
The solid-liquid equilibrium in argon, O. K. Rice—472
Spectra of liquid crystals, R. Taschek and D. Williams——546
Structure of the liquid state, R. W. Gurney and N. F. Mott—222(L)
Theory of, S. F. Harrison and J. E. Mayer—101
Theory of, J. E. Mayer and S. F. Harrison—87
X-ray diffraction analysis of water, J. Morgan and B. E. Warren—666
X-ray diffraction by aliphatic amines, B. V. Thosar—654(L)
X-ray diffraction by liquid yellow phosphorus, C. D. Thomas and N. S. Gingrich—659
X-ray diffraction by liquid potassium, C. D. Thomas and N. S. Gingrich—411
X-ray diffraction by methyl alcohol, G. G. Harvey—111

Magnetic moment
Of deuteron, L. Farkas, and U. Garbatski—260, 904
Magnetic properties
Of caesium titanium alum, J. H. Van Vleck—81
Curie-point of nickel, C. B. Post and W. R. Ham—598
Of nitrosyl chloride, C. M. Beeson and C. D. Coryell—657(L)
Susceptibilities of inorganic complex compounds, J. H. Frazer and N. O. Long—462
Theory of ferromagnetism, J. H. Van Vleck—105
Mechanics, Quantum
Of alkali halide-thallium phosphors, F. Seitz—150
Band envelopes of unsymmetrical rotator molecules, R. M. Badger and L. R. Zumwalt—711
Compressibilities of alkali metals, J. Bardeen—372
Electronic structure of hydrides, G. W. King—378
Energies of metallic Li and Na, J. Bardeen—367
Of excited H_2, A. S. Coolidge and H. M. James—730
Of excited state of LiH, E. J. Rosenbaum—16
Forces between ions in solution, R. W. Gurney—499
Frequencies of tetramethylmethane and tetramethylsilicon, F. T. Wall and C. R. Eddy—107(L)
London's dispersion forces, H. Margenau—896
Lower excited levels of benzene, M. Goeppert-Mayer and A. L. Sklar—645
Optical activity of secondary and butyl alcohol, E. Gorin, J. Walter and H. Eyring—824
Of zinc sulphide phosphors, F. Seitz—454
Mechanics, Statistical
Of adiabatic demagnetization of caesium titanium alum, J. H. Van Vleck—81
Adsorption of hydrogen and deuterium, A. Wheeler—749
Of condensing systems, W. Band—654(L)
Of condensing systems, S. F. Harrison and J. E. Mayer—101
Of condensing systems, J. E. Mayer and S. F. Harrison—87
Intermolecular forces from Joule-Thomson coefficients, J. O. Hirschfelder, R. B. Ewell, and J. R. Roebuck—177(A), 205
Of the liquid state, R. W. Gurney and N. F. Mott—222(L)

Mechanics, Statistical (continued)
Of liquids, J. F. Kincaid and H. Eyring—620
Of mobile monolayers, W. Band—748(L)
Nonadiabatic reactions, M. G. Evans, H. Eyring and J. F. Kincaid—349
Order and disorder in solid solutions, J. G. Kirkwood—70
Order and disorder in ternary structures, F. C. Blake—630
Of order in copper-gold alloys, W. Shockley—130
Reaction rates and entropy of activation, A. E. Stearn—176(A)
Theory of adsorption, G. E. Kimball—447

Molecular Spectra
Absorption spectra of carboxylic acids, M. M. Davies and G. B. B. M. Sutherland—755, 767
Of allene, E. H. Eyster—580
Of azomethane, W. West and R. B. Killingsworth—1
Bands ascribed to HNO_2, D. M. Newitt and L. R. Outridge—752
Of CH_3OD and CH_2DOD, E. F. Barker and G. Bosshieter—563
Of cis- and transbutene-2, H. Gershinowitz and E. B. Wilson, Jr.—247
Of cyclohexene, cyclopentene, 1-3 cyclohexadiene and benzene, E. P. Carr and H. Stücklen—55
Of cyclopropane, ethylene oxide, ethylene sulfide, and ethylene imine, E. H. Eyster—576
Of deuteroformaldehyde, E. S. Ebers and H. H. Nielsen—311
Of double and single formic acid molecules, L. G. Bonner and R. Hofstadter—531
Of ethane, B. L. Crawford, Jr., W. H. Avery and J. W. Linnett—682
Excitation of HgH, HgD, and CdD, L. O. Olsen—307
Of heavy formic acid, R. Hofstadter—540
And hydrogen bond, R. Freymann—497(L)
Of light and heavy acetic acid, R. C. Herman and R. Hofstadter—534
Of methyl alcohol, A. Borden and E. F. Barker—553
Of methylamine and free rotation, H. W. Thompson and H. A. Skinner—775
Of nickel carbonyl, B. L. Crawford, Jr., and P. C. Cross—525
Of nickel carbonyl vapor, C. R. Bailey and R. R. Gordon—225(L)
Of $N^{14}-N^{15}$, R. W. Wood and G. H. Dieke—734
Of N^{14}, N^{15} and N_2^{15}, R. W. Wood and G. H. Dieke—908(L)
Of polyatomic molecules, H. Sponer—174(A)
Ultraviolet bands of acetylene, Sho-Chow Woo, Ta-Kong Liu, T. C. Chu and Wu Chih—240

Molecular Structure and Constants
Of acetylene, Sho-Chow Woo, Ta-Kong Liu, T. C. Chu and Wu Chih—240
Of azomethane, dimethylhydrazine and acetaldazine, W. West and R. B. Killingsworth—1
Band envelopes of unsymmetrical rotator molecules, R. M. Badger and L. R. Zumwalt—711
Of benzene and benzene-d_6, A. Langseth and R. C. Lord, Jr.—203
Of boron trifluoride gas, D. M. Yost, D. DeVault, T. F. Anderson and E. N. Lassettre—424
Of CH_3OD and CH_2DOD, E. F. Barker and G. Bosschieter—563
Of carbon tetrachloride, C. K. Wu and G. B. B. M. Sutherland—114
Of chloro- and bromomethanes, formaldehyde and phosgene, D. P. Stevenson and J. Y. Beach—25
Of cyclohexene, cyclopentene, 1-3 cyclohexadiene and benzene, E. P. Carr and H. Stücklen—55
Of deutero-ethylenes, M. de Hemptinne, J. Jungers and J. M. Delfosse—319
Of deutero-formaldehyde, E. S. Ebers and H. H. Nielsen—311
Of diborane, T. F. Anderson and A. B. Burg—586
Of double and single formic acid molecules, L. G. Bonner and R. Hofstadter—531
Energy of H_3 and H_3^+, J. O. Hirschfelder—795
Of excited state of LiH, E. J. Rosenbaum—16
Of heavy formic acid, R. Hofstadter—540
Of hydrides of boron, S. H. Bauer—176(A)
Internal restricting potential of ethane, G. B. Kistiakowsky and F. Nazmi—13
Internal rotation in ethylene chloride, J. Y. Beach and K. J. Palmer—639
Internal rotation of ethane, G. B. Kistiakowsky, J. R. Lacher and F. Stitt—407(L)
Of ketene and thiophosphoryl chloride, J. Y. Beach and D. P. Stevenson—75
Of light and heavy acetic acid, R. C. Herman and R. Hofstadter—534
Of methyl alcohol, A. Borden and E. F. Barker—553
Of methylamine, H. W. Thompson and H. A. Skinner—775
Modes of vibration for various types of symmetry, H. J. Bernstein—718
Of nickel carbonyl, B. L. Crawford, Jr., and P. C. Cross—525
Of nitrogen tetroxide and nitrogen dioxide, W. F. Giauque and J. D. Kemp—40
Nuclear spin and symmetry effects in ethane, E. B. Wilson, Jr.—740
Predissociation process, G. K. Rollefson and M. Burton—674
Secular equation for molecular vibrations, E. B. Wilson, Jr., and B. L. Crawford, Jr.—223(L)
Of tetramethylmethane and tetramethylsilicon, F. T. Wall and C. R. Eddy—107(L)

Optical Properties
Dispersion electrons of OH, O. Oldenberg and F. F. Rieke—439
Rotatory power of secondary butyl alcohol, E. Gorin, J. Walter and H. Eyring—824
Rotatory power of solutions, K. Cohen and C. O. Beckmann—163

Phosphorescence
Zinc sulphide phosphors, F. Seitz—454

Photochemistry
Acetone in presence of hydrogen, H. S. Taylor and C. Rosenblum—119
Calculation of bond strength, M. Burton—818
Decomposition of ethane, E. W. R. Steacie and N. W. F. Phillips—179
Decomposition of mercury dimethyl, J. P. Cunningham and H. S. Taylor—359
Exchange between deuterium and hydrogen chloride, P. A. Leighton and P. C. Cross—345
Limits of infra-red sensitizing, G. Kornfeld—201
Mercury photosensitized hydrogenation of ethylene and deuterized ethylenes, J. C. Jungers and H. S. Taylor —325
Migration of excitation energy in crystals, J. Franck and E. Teller—861
Of nitrous oxide, F. C. Henriques, Jr., A. B. F. Duncan and W. A. Noyes, Jr.—518
Photolysis of deutero-ammonia, M. Burton—680
Photosynthesis, A. F. Knoll, F. L. Matthews, Jr., R. H. Crist—109(L)
Predissociation processes of polyatomic molecules, G. K. Rollefson and M. Burton—674
Primary processes in, M. Burton and G. K. Rollefson—416, 908(L)

Raman effect
In liquid acetylene, G. Glockler and M. M. Renfrew—340(L)
In liquid ethane, G. Glockler and M. M. Renfrew—295(L)
Of liquid ethylene, G. Glockler and M. M. Renfrew—170(L)
Recent developments, J. H. Hibben—174(A)

Raman spectra
Of allene, J. W. Linnett and W. H. Avery—686
Of azomethane, dimethylhydrazine and acetaldazine, W. West and R. B. Killingsworth—1
Of benzene, H. C. Cheng, C. F. Hsueh and Ta-You Wu—8
Of benzene and benzene-d_6, A. Langseth and R. C. Lord, Jr.—203
Of benzene and isotope effect, B. S. R. Rao—343
Of boron trifluoride gas, D. M. Yost, D. DeVault, T. F. Anderson and E. N. Lassettre—424
Of carbon tetrachloride, C. K. Wu and G. B. B. M. Sutherland—114
Of cis- and transbutene-2, H. Gershinowitz and E. B. Wilson, Jr.—247
Of cyclopropane and ethylene oxide, J. W. Linnett—692
Of deutero-ethylenes, M. de Hemptinne, J. Jungers and J. M. Delfosse—319
Of diborane, T. F. Anderson and A. B. Burg—586
Of dimethylacetylene, G. Glockler and M. M. Renfrew —408(L)
Of dioxane, H. W. Hunter—544
Of ethane, B. L. Crawford, Jr., W. H. Avery and J. W. Linnett—682
Of hexamethylene glycol, R. C. Williamson—653(L)
Of hydrogen and deuterium sulfides, G. E. Murphy and J. E. Vance—426
Of liquid ethylene and ethane, G. Glockler and M. M. Renfrew—409(L)
Low and high frequencies for water, G. Bolla—225(L)
Of nitrate solutions, E. R. Laird and F. M. Plesset—592
Of nitrogen, C. E. Miller—902
Polarization of acetic acid, acetone, and ethanol lines, J. T. Edsall and E. B. Wilson, Jr.—124
Polarization of Raman lines, J. T. Edsall and E. B. Wilson, Jr.—124
Of thiophosgene, H. W. Thompson—748(L)

Solutions
Absorption spectra of aqueous cobalt chloride, R. Brdička—404
Absorption spectra of carboxylic acids, M. M. Davies and G. B. B. M. Sutherland—755, 767
Absorption spectrum of omega-hydroxyundecanoic acid in carbon tetrachloride, M. M. Davies—770
Conductances of europium chloride and europium nitrate, J. M. Klotz—907(L)
Electrolytic dissociation theory, S. Freed—655(L)
Exchange and electrostatic forces between ions, R. W. Gurney—499
Optical rotatory power, K. Cohen and C. O. Beckmann —163
Order and disorder in binary solid solutions, J. G. Kirkwood—70
Raman spectra of phenol, W. Gordy and A. H. Nielsen —12
Spectra of cobalt chloride, J. N. Pearce and L. R. Dawson —128
Spectra of H_2O, HDO and D_2O in inert solvents, L. B. Borst, A. M. Buswell and W. H. Rodebush—61
Symmetries of fields about ions, S. Freed and S. I. Weissman—297(L)
Symmetries of fields about ions, S. Freed and H. F. Jacobson—654(L)
Theory of conductance, M. J. Polissar—833
Theory of dissociation constants, F. H. Westheimer and J. G. Kirkwood—513
Transference numbers, T. Shedlovsky—845
Transference numbers of potassium acetate in water, D. J. LeRoy and A. R. Gordon—398

Sound
Propagation of, in gases, H. L. Saxton—30, 168(L)

Spectra
Of alkali halide-thallium phosphors, F. Seitz—150
Of zinc sulphide phosphors, F. Seitz—454

Surface Phenomena
Adsorption of hydrogen and deuterium, A. Wheeler —746
Arrangement of molecules in single and multiple layers, L. H. Germer and K. H. Storks—280
And biological problems, W. D. Harkins—171(A)
Dipole moments and surface potentials, M. Gerovich, A. Frumkin and D. Vargin—906(L)
Interaction between films and solutions, H. Sobotka—172(A)

Surface Phenomena (continued)
Interaction in mixed monolayers, R. T. Florence and W. D. Harkins—856
Interaction in mixed monolayers, W. D. Harkins and R. T. Florence—847
Of mobile monolayers, W. Band—748(L)
Overturning and anchoring of monolayers, I. Langmuir—171(A)
And problems of cell division, G. H. A. Clowes—172(A)
Surface viscosimetry, W. D. Harkins and J. G. Kirkwood—298(L)
Of unimolecular and multimolecular layers, L. H. Germer—171(A)
Viscosity of monolayers, W. D. Harkins and J. G. Kirkwood—53(L)
Viscosity of monomolecular films, D. G. Dervichian and M. Joly—226(L)
Viscosity of unimolecular films, W. J. Moore, Jr., and H. Eyring—391

Thermionic emission
From rhodium, H. B. Wahlin and L. V. Whitney—594
Thermodynamic properties
Of alkali halides, J. E. Mayer and I. H. Wintner—301
Of allene, J. W. Linnett and W. H. Avery—686
Of chloro- and bromomethanes, formaldehyde and phosgene, D. P. Stevenson and J. Y. Beach—25, 108(L), 341(L)
Communal entropy and theory of fusion, O. K. Rice—476
Of cyclopropane and ethylene oxide, J. W. Linnett—692
Dissociation constants of organic acids, J. G. Kirkwood and F. H. Westheimer—506
Dissociation constants of organic acids, F. H. Westheimer and J. G. Kirkwood—513
Electromotive force of cells containing D_2O, G. W. Vinal and L. H. Brickwedde—175(A)
Energies of metallic Li and Na, J. Bardeen—367
Entropy of acetone and isopropyl alcohol and dehydrogenation of isopropyl alcohol, S. C. Schumann and J. G. Aston—485
Entropy of methanol, J. O. Halford and B. Pecherer—571
Free energy of acetylene, A. R. Gordon—219
Heat capacities and energies of $SiCl_4$, $TiCl_4$, $SnCl_4$, R. C. Herman—406
Heat capacities of propane and propylane, G. B. Kistiakowsky, J. R. Lacher, and W. W. Ransom—900
Heat capacity of diamond, K. S. Pitzer—68
Heat capacity of ethane, E. B. Wilson, Jr.—408(L), 740
Heat capacity of gaseous ethane, G. B. Kistiakowsky and F. Nazmi—18
Hydration of ethylene, and entropy of ethyl alcohol, S. C. Schumann and J. G. Aston—480
Of nickel carbonyl, B. L. Crawford, Jr. and P. C. Cross—525
Of nitrogen tetroxide and nitrogen dioxide, W. F. Giauque and J. D. Kemp—40
Of nitrosyl chloride, F. P. Jahn—335
Of normal pentane and tetramethylmethane, F. D. Rossini and J. W. Knowlton—168(L)
Producer-gas reaction and "zero-point" entropy of graphite, F. D. Rossini—569(L)
Solid-liquid equilibrium in argon, O. K. Rice—472
Spin effects in the heat capacity of ethane gas, E. B. Wilson, Jr.—408(L)
Theory of Dissociation Constants of organic acids, F. H. Westheimer and J. G. Kirkwood—513
Thermodynamics
Recent advances, M. Randall—174(A)

Ultracentrifuge
Thyroid protein sedimentation, H. P. Lundgren—177(A)

Valence
Calculation of bond strengths, M. Burton—818
Electronic structure of hydrides, G. W. King—378
Hydrogen bond, I. E. Coop, N. R. Davidson and L. E. Sutton—905(L)
Hydrogen bond and infra-red absorption, A. M. Buswell and W. H. Rodebush—296(L)
Intermetallic compounds in alloys, F. Bitter—339(L)
Intra- and intermolecular hydrogen bond, R. Freymann—497(L)
Rotation about carbon bond, G. B. Kistiakowsky, J. R. Lacher, and W. W. Ransom—900
Structure of H_3 and H_3^+, J. O. Hirschfelder—795
Structure of H_3 and H_3^+, J. O. Hirschfelder and C. N. Weygandt—806
Vapor pressures
Of alkali halides, J. E. Mayer and I. H. Wintner—301
Vegetable oils and fats
Apparent diene values of, W. G. Bickford, F. G. Dollear and K. S. Markley—176(A)
Vitamins
Substance stimulating sexual reproduction, V. G. Lilly and L. H. Leonian—178(A)

X-ray diffraction
By allotropic forms of phosphorus, C. D. Thomas and N. S. Gingrich—659
Of liquid methyl alcohol, G. G. Harvey—111
From liquid potassium, C. D. Thomas and N. S. Gingrich—411
By liquid aliphatic amines, B. V. Thosar—654(L)
By liquid water, J. Morgan and B. E. Warren—666
X-rays
Chemical reactions of organic compounds and water, H. Fricke, E. J. Hart and H. P. Smith—229
